Overview

Surya Processors Private Limited (SPPL), a name widely preferred and trusted for its high quality in the textile world, started operations in 1986 in Ghaziabad (20 km from New Delhi). The facility started with Dyeing and Finishing capabilities and has since expanded into Weaving, Printing and Yarn-dyed fabrics. SPPL, with a flair of perfection, serves both the domestic and the international market. It has established a name for itself for its novel designs, excellent quality and has the best work force and technology. With 2,75,000 sq. ft. of production area, SPPL can process 100,000 meters of fabric per day.

With the commitment to do dedicated and diligent work, SPPL has been successful in winning over some great line of clientele both in the domestic market and overseas. Its fabric ends up in brands like Reebok, Adidas, Levi's, GAP, J.C. Penney and H&M. Domestic brands like Madura Garments, Blackberrys and Reliance Trends also source fabric from SPPL.

Our Belief Our Inspiration

"Nothing can replace the level of contentment and satisfaction one achieves by giving one's hundred percent."

At SPPL, we believe in giving our best to each and every product we manufacture. Our passion for our work echoes its own story. We aspire to deliver interlinings and fabrics through the integration of best of our human resources and the best technology because our clients' and customers' satisfaction serves as our belief, our inspiration.

Quality

There is no scope for mistakes in the present dynamic Indian textile industry. The very belief of the organization and its work force in giving their best shot has brought us face to face with the global market. It has provided us with an inspiration to deliver products that call for perfection not only to the domestic but the international clients too. Working hard to our full potential has made us produce quality products and help us win the trust of our customers and clients.

Our in-house production facilities promise to deliver each and every product through complete quality tests. We always make an effort towards building mutually beneficial relationships with our vendors and employees.

FABRICS

A state-of-the-art weaving and processing plant enables us to produce various kinds of fabrics such as cotton, viscose, polyesters and its blends, lycras, corduroy and yarn-dyed. Machinery & Equipment

Weaving

1. Toyota Air Jet Looms
2. Sulzer Micro-processed 143" Looms
3. Warping and Sizing
4. Weaving Design software

Processing

1. Monforts (Germany) Continuous Dyeing Range, with On-Line computer & E-Control
2. Kleinwefers Bicoflex Padder equipped with Computerized Pleva
3. Menzel fully automatic chain-type Mercerizer
4. Menzel open width Continuous Bleaching Range
5. Franz Muller (Germany) Cutting, Brushing & Polishing Plant for Corduroy & Velvet
6. Osthoff Singeing & Desizing Machine
7. 12 Color Rotary Printing Machine
8. Fong's PLC based HTHP Yarn Dyeing Plant
9. Seven Chamber Continuous Washing Plant
10. Sueding/Brushing Machine (LIZA)

Test Lab Equipment

1. Color Matching Computer - Macbeth 7000 A
2. Macbeth Color Matching Cabinet - Spectra III
3. Labortex Rapid Dye Continuous Dyeing Range
4. Washing Fastness
5. Shrinkage Testing
6. Rubbing Fastness
